

Manufacturers of Concrete Repair & Restoration Systems

Williams Technology 260,000 Sq.Ft. Deck Still Protected After 10 Years!

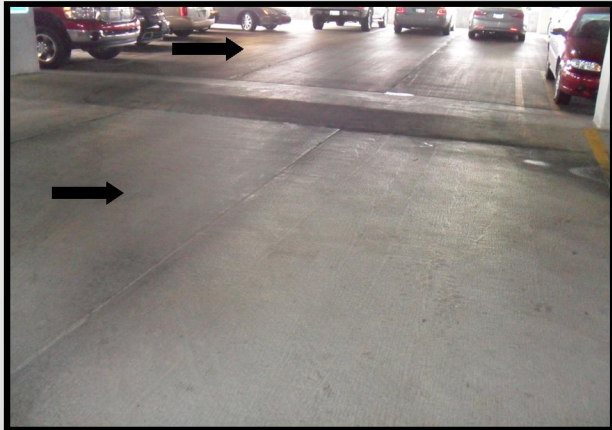

Williams Technology Garages...the name has changed but the protection remains the same.

One Tech Center in Tulsa, Oklahoma is now owned and operated by the City of Tulsa. The multi level garage receives daily traffic to those visiting or working at the adjacent City Hall.

When the garage was built in 2001 it received an application of Strongcote SC-113 traffic membrane on the pre-topped, pre-cast concrete decking to provide added protection and add longevity to the structure.

Ten years later the Strongcote System is showing no signs of wear or fatigue. Even in areas of high abrasion such as drive lanes or the main ingress/egress to the garage the Strongcote is exhibiting excellent performance and is in no need of re-coating.

The local engineering firm hired by the city to survey and monitor the condition of the garage is amazed at the durability of [Strongcote](#) and plans to specify the product on other local projects.

Turning radius showing no signs of wear
